

Ask and answer in Scratch

Use these blocks to ask a question and then reply.

The answer block holds whatever the player typed in.

```
when green flag clicked
ask 'What's your name?' and wait
say 'Hello!' for 2 secs
say 'answer' for 2 secs
```

```
when green flag clicked
ask 'What is 4 + 5?' and wait
if answer = 9
say 'correct!' for 2 secs
else
say 'sorry, wrong!' for 2 secs
```

Use the if/else block to say different things according to the answer.

You can even add a score and create a quiz.

Create a variable called score. Then you will get the blocks you need to add.

```
when green flag clicked
set score to 0
ask 'What is 4 + 5?' and wait
if answer = 9
say 'correct!' for 2 secs
change score by 1
else
say 'sorry, wrong!' for 2 secs
ask 'What's 3 + 7?' and wait
if answer = 10
say 'correct!' for 2 secs
change score by 1
else
say 'sorry, wrong!' for 2 secs
say 'join your score is ' + score for 2 secs
```
